

Armstrong® TECH ZONE CEILING SYSTEM

Air Diffusers

**Slot diffusers compatible
with Armstrong® TECH ZONE**

TECHLINED 280 AND TECHLINED 290 SERIES

Description

Aldes TechLined 280 and TechLined 290 slot diffusers have been specifically designed to fit the Armstrong TECH ZONE Ceiling solutions.

Whilst boasting the classic series' renowned qualities of optimum comfort and on site adaptability, TechLined air diffusers can be installed instead and in place of Armstrong ceiling tiles, in the "technical area" of the ceiling, and align with other ceiling apparatus, such as light fittings or sprinklers. The finish is identical to that of Armstrong tiles and frames. Designed to fit standard TECH ZONE widths of 150mm and 300mm, the TechLined series is available in 1 to 6 slots, with either 20mm or 25mm wide slots.

Advantages

- Optimum comfort provided by diffusing air through slots using the Coanda effect.
- Diffusion can be oriented independently through each slot.
- Installation is 100% compatible with Armstrong TECH ZONE (see diagram on the back).
- Finish is identical to Armstrong TECH ZONE ceiling tiles and frames: "Global White" epoxy paint, 20% matt finish.

Range

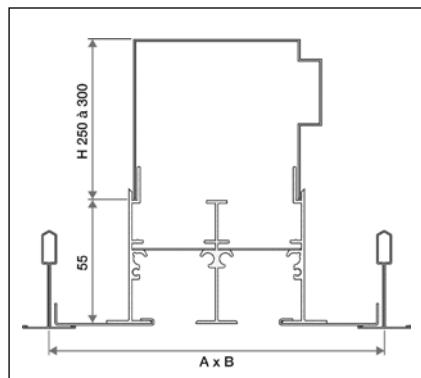

- Designed to fit 150mm and 300mm Armstrong TECH ZONE ceilings.
- Available in 1 to 6 slots depending on the width of the ceiling.
- 2 slot widths:
 - TechLined 280 type / width of slot 20 mm.
 - TechLined 290 type / width of slot 25 mm.
- Designed for the following ceiling tiles:

| | | | | |
|---------------|------|------|------|------|
| A (mm) | 1200 | 1350 | 1200 | 1350 |
| B (mm) | 150 | 150 | 300 | 300 |

Armstrong® TECH ZONE CEILING SYSTEM
